to fit you!

CUSTOMSIZED TO FIT!

A comprehensive ergonomic seating solution featuring 9 models. ERGO BOSS provides more choices than typical task seating so chairs fit the size, shape, and working preferences of individuals. Seating can be specified while maintaining a uniform look throughout the office. Designed to accommodate many body sizes by offering a choice of seat cushion size and a choice of backrest size to suit an individual's tasks.

ERGO BOSS – The new key to comfort and productivity!

Executive Backrest 42.7" to 47" tall

Best choice for taller individuals, especially if the user reclines frequently.

High Backrest 38.3" to 40.6" tall

Supports shoulders of most user sizes.

Medium Backrest 33.7" to 36" tall

All backs allow free movement of upper body. The best choice if tasks involve a lot of upper body movement.

1 Select a seat

Select a seat cushion that matches an individual's shape and size. It needs to:

- be wide enough for the hips and allow for comfortable changes in posture
- have adequate depth to allow the user to rest the back comfortably against the backrest without feeling pressure behind the knees.

All seats are made with high density foam and are designed to evenly distribute body weight over the entire seating surface.

2 Select a backrest

Choose a backrest that suits an individual's preferred posture, back height and tasks.

All Ergo Boss backrests feature height adjustment, Schukra depth adjustable lumbar support and dual density foam spine-pad.

Executive Backrest

Supports shoulders as you recline - best choice if you recline a lot, especially for taller individuals.

High Backrest

Supports shoulders of most users as you recline.

Medium Backrest

Allows free movement of upper body as the top of backrest is below shoulder blades on most users. The best choice if your tasks involve a lot upper body movement to access equipment and materials around you.

Generous Size Seat

Wider seat (20.4" wide)

Seat Depth on multi-tilter adjust from 16.9" to 19.5" deep.

Seat Height, standard with 5" pneumatic lift, for tall users (Provides 17"-22" seat height as standard and accommodates medium to tall users.) Other sizes of pneumatic lifts are optional.

Standard Size Seat

Universal seat (18.8" wide)

Seat Depth on multi-tilter adjusts from 16.1" to 18.7" deep.

Seat height, standard with 4" pneumatic lift, for average size users (Provides 15.5" to 19.5" seat height as standard.) Other sizes of pneumatic lifts are optional.

Small Size Seat

Narrow seat (17" wide)

Seat Depth on multi-tilter adjusts from 15.7" to 18.3" deep.

Seat height, standard with special low rise 4" pneumatic lift, for smaller users. (Provides 14.5" to 18.5" seat height as standard.)

ERGONOMIC FEATURES

BACK SHAPE - The slender upper back cushion shape allows unrestricted arm and upper body movement. Regardless of the back size the central and lower portions of the cushion effectively and comfortably support the back. Freedom of movement can be important to comfort and productivity. Three backrest heights are available to suit different users needs.

SPINE-PAD - A special comfort "spine-pad" is incorporated into the back of each ERGO BOSS chair. It is made of molded foam, with an inset of memory foam. The memory foam is activated by body heat and pressure and molds to the back's shape, thereby reducing pressure points along the spine.

BACK HEIGHT ADJUSTMENT - All chairs feature a **5.25" concealed ratchet style** back height / lumbar height adjustment providing extended back height range. This allows proper vertical positioning of the lumbar support.

SCHUKRA LUMBAR SUPPORT - Each chair is equipped with a depth adjustable lumbar support. Simply rotate the lever on the back to increase or decrease the amount of lumbar support. You control the back shape and comfort.

G2 - G3 ARMS - STANDARD - The standard arms (G2 – G3) move in five directions: height adjustable (8.3" to 11.2" above the seat), width adjustable (WA), slide forward and back, rotate 30° inwards and slide over the seat ¾" each side. Features a wide arm cap made from soft durable polyurethane. G2 arms are standard on standard and small seat models. G3 arms are standard on generous seat models.

ADJUSTABLE SEAT DEPTH - Seat slides forward and back for depth adjustment, to match thigh length.

SEAT HEIGHT - Each seat size has a specific seat height. A choice of optional pneumatic cylinders allow users to select a seat height range that matches their lower leg length.

SOFT DESCENT GAS CYLINDER - Soft descent gas cylinder provides a smooth seat height adjustment that eliminates "spine shock".

ADJUSTABLE TILT TENSION - ERGO BOSS chairs feature tilting actions that allow the user to adjust the balance/spring tension of their chair to match their body weight for comfortable, smooth, yet supportive movement.

CASTERS - Dual wheel carpet casters are standard. Upon request, dual wheel casters for hard flooring can be provided.
