

“Colour quality as impressive as its networking feature?” Absolutely.

It takes a truly uncommon printer to work as your home or office's common printer. The compact CLP-320N from Samsung does the job of several larger printers. Its network capabilities let your family or colleagues connect and get vivid, high-quality colour printing performance, without having to rely on a fleet of printers to meet their needs. With up to 2400 x 600 dpi, the CLP-320N effortlessly delivers maximum colour while stylishly sporting a minimal design, with its chic black and crème grey façade. All this style and power, yet the compact CLP-320N fits easily almost anywhere.

Capture what catches your eye

Samsung's AnyWeb Print software lets you go hunting and gathering on the Web. You can utilise the CLP-320N to easily select, drag, and drop content from different web pages onto a printable scrap board in your browser window, all while you surf the web. It's an easy way to collect, arrange, and edit useful reference points and resources you can only find on the web for big projects-or even just for fun.

One less noisy office distraction

You shouldn't have to struggle to hear yourself think while sitting at your own desk. That's why the Samsung CLP-320N is engineered to be whisper quiet, generating a noise level of just 45 dBA (Colour) and 47 dBA (Mono) while it's printing. That's less than the gentle hum of a running refrigerator! A desktop printer that does its work while letting you focus on yours? Cool.

Your printing experience just got a lot more colourful.

The CLP-320N easily delivers colour accuracy through premium quality 2400 x 600 dpi resolution with absolute ease. Also, with toner particles that are smaller and more uniform in shape than traditional toner particles, you'll be impressed with accurate colours and beautiful, glossy printouts.

Lessen your wait, not your expectations

Quit losing productivity waiting around for your documents to print – the Samsung CLP-320N's fast print speed (16 ppm for mono, 4 ppm for colour) will have you back to work in no time. In Ready Mode, the CLP-320N features a First Page Output Time (FPOT) of only 14 seconds for black and 26 seconds for colour, satisfying your need for speed. An impressive 2400 x 600 dpi print resolution satisfies your demand for quality.

A soft approach to energy efficiency

In today's green office environment, there's simply no room for energy-hogging printers. That's why the Samsung CLP-320N features an easy-to-reach power button right on the control panel, so you can switch to an energy-saving standby mode at the push of a button. Want to print? Just press the button again to power back up, and you're ready to go.
