

# Logitech® Wireless Combo MK520

## A sleek set for comfortable control

With a roomy full-size keyboard, contoured laser mouse, and a single wireless receiver that connects them both to your computer, you've got convenience and control comfortably at your fingertips.

### FEATURE AT A GLANCE

#### Feel-good typing

Concave keys with softly rounded edges let your fingertips glide from key to key, barely making a sound.

\* Keyboard battery life calculation based on estimated two million keystrokes/year in office environment. User experience may vary. Mouse battery life may vary based on user and computing conditions.

\*\*The laser sensor does not work on glass or mirrors.

#### Power-efficient design

Rarely change batteries with up to three years of battery life for keyboard and one year for mouse\*.

#### Reliable, robust connections

Logitech Advanced 2.4 GHz wireless for powerful connectivity with virtually no delays or dropouts.

#### Hand-friendly precision

Contoured full-size laser mouse with soft rubber side grips for smooth, accurate cursor control on just about any surface\*\*.

#### Logitech Unifying receiver

One tiny wireless receiver stays in your computer and connects the keyboard and mouse—without the hassle of multiple USB receivers.
